

Bhumika Mishra

Aspiring Cyber Security Analyst

6355915116 mishrabhumika43@gmail.com [LinkedIn-Profile](#) [Portfolio](#) Open to Relocation

Professional Summary

I'm a cybersecurity enthusiast who enjoys learning how systems work and how to make them more secure. My interest lies in Security Operations (SOC), Vulnerability Assessment, and I'm currently exploring SIEM tools. I believe in hands-on learning – I've spent time solving real-world inspired challenges on TryHackMe and Hack The Box to build practical skills.

Education

Bachelor of Engineering in Computer Engineering

GIDC Degree Engineering College, Abrama (GTU)

Pursuing

Diploma in Computer Engineering

Government Polytechnic Waghai (GTU) – 1st rank holder

2020 – 2023

Technical Skills

Operating Systems: Windows, Basic Linux

Networking: TCP/IP, DNS, HTTP/HTTPS

Cybersecurity Fundamentals: Vulnerability Assessment, Encryption (AES, RSA), Hashing

Security Tools: Nmap, Wireshark, Kali Linux, SQLMap, Hydra, Zenmap

Programming: Python, Java

Web Technologies: HTML, CSS, JavaScript, PHP, MySQL

Frameworks & Concepts: Basic SIEM Awareness, Risk Identification, MITRE ATT&CK Framework(basic)

Internship Experience

Cyber Security Trainee

Dec 2025 – Mar 2026 | Tata STRIVE

- Completed an intensive 4-month training focused on cybersecurity fundamentals and practical applications
- Gained hands-on experience with Kali Linux tools including SQLMap, Hydra, Wireshark, Nmap, and Zenmap
- Performed basic vulnerability scanning and network analysis tasks
- Practiced penetration testing fundamentals and ethical hacking methodologies
- Developed understanding of digital forensics basics and system security concepts

Projects

SQLiShield – SQL Injection Detection Tool [\[https://github.com/Bhumika02052002/SQLiShield\]](https://github.com/Bhumika02052002/SQLiShield)

- Built a Python-based desktop application to automate SQL injection testing
- Integrated SQLMap for real-world vulnerability scanning

- Designed modular UI using PySide6 with real-time scan output
- Parsed scan results using regex to identify vulnerabilities and risk levels
- Generated structured PDF reports using Report Lab

Smart Port Scanner[\[https://bhumika02052002.github.io/sixteen-clothing-website/\]](https://bhumika02052002.github.io/sixteen-clothing-website/)

- Developed a network scanning tool to identify open ports and running services
- Provided insights into potential security risks

SecurePass Pro—Password Strength Analyzer[\[https://bhumika02052002.github.io/sixteen-clothing-website/\]](https://bhumika02052002.github.io/sixteen-clothing-website/)

- Built a tool to evaluate password strength using entropy-based logic
- Provided real-time feedback and best practices for secure passwords

Certifications & Achievements

- SAP Code Unnati - Emerging Technologies Certificate (ID: CU25_17981)
Training in IoT, Deep Learning, ML & Computer Vision, Trained in AI > ML > DL > CV
- SAP Code Unnati - Advance core detail analysis of POWER PI TOOL
- Public Speaking Competitions (Elocution) – 1st Place Winner
- 10-Day Employability Development Workshop Focused on communication, career readiness.
- CISCO Basic of Cyber Security and Ethical Hacking (*Pursuing*)

Hands-on Cybersecurity Practice

- Actively practice on platforms like TryHackMe and Hack The Box to build practical security skills
- Completed 50+ labs/rooms covering real-world attack and defense scenarios
- Performed vulnerability scanning using Nmap and OpenVAS
- Explored web application security (SQL Injection, XSS, File Inclusion)
- Analyzed network traffic using Wireshark
- Practiced password attacks using Hydra and John the Ripper
- Gained exposure to basic digital forensics and log analysis
- Developed a practical understanding of security operations and threat analysis
